

Education

Universidad del Valle de Guatemala

Science and Information Technology Engineering

July 2023 – Present | Expected Graduation 2028

Awards:

- Academic Merit 2024 (annual average > 85)
- Academic Merit 2025 (annual average > 85)

Colegio APDE Entrevalles

Bachillerato Ciencias y Letras

International Baccalaureate Diploma | 2022

Projects

Portafolio | JavaScript, React, CSS, Three JS

- Designed and developed a personal portfolio showcasing software development projects and technical skills.
- Portfolio: <https://sofia-lopez.netlify.app/>
- Repository: <https://github.com/Sofilayerdi/Portafolio.git>

BELEK - Aplicación móvil | Android Studio, Kotlin Jetpack Compose

- Developed a mobile application following MVVM architecture with reactive state management using Coroutines and StateFlow.
- Integrated Supabase authentication and real-time PostgreSQL database services.
- Implemented Room Database for offline-first functionality and bidirectional synchronization.
- Integrated Google Maps SDK with geocoding and automatic user location detection.
- Managed source control and team collaboration through Git and GitHub.
- Repository: https://github.com/KristCg/PM_Proyecto.git

Bloom | React, Golang, CSS, PostgreSQL, GORM, Docker

- Full-stack web application developed with React, Go, and PostgreSQL for inventory, sales, and report management.
- Implementation of role-based access control with five user roles: Super Admin, Manager, Seller, Auditor, and Buyer, each with different permissions and functionalities.
- Development of CRUD operations using GORM for product, client, employee, and inventory management.
- Integration of stored procedures and database functions for sales registration, stock updates, bouquet creation, and sales reporting, including transaction handling and error validation.
- Containerization of frontend, backend, and database services using Docker and Docker Compose for deployment and development.
- Repository: https://github.com/Sofilayerdi/Proyecto2_BDD1.git

Web Calculator | TypeScript, React

- Web calculator developed with React and TypeScript using reusable components and static typing.
- Implementation of basic arithmetic operations, decimal number support, display management, and error handling for invalid calculations.
- Development of unit tests using Vitest and Testing Library to validate application functionality.
- Documentation of UI components with Storybook to improve maintainability and component reuse.
- Repository: <https://github.com/Sofilayerdi/Calculadora-web.git>

Work Experience

Universidad del Valle Guatemala

Course Grader, Calculus I & Algorithms and basic programing | July 2025 – June 2026

- Assisted the professor in grading assignments and exams for the course Calculus 1 and Algorithms and basic programming.

American Eagle

Cashier (Seasonal) | Dec 2024

- Assisted customers and processed transactions efficiently.

Conduent

Customer Service Representative | Dec 2022 – Jun 2023
